

A One Day Course for Local Authority, HPA and PCT Officers

Facilitated by:

James Button BA., Solicitor, MCI Arb, MIO L. Principal,.

Everyone involved in Public Health needs to be aware of the legal framework within which they operate.

This course examines how the various organisations (HPA, Local Authority, PCT) are constituted, and how they work together.

It considers how the CCDC, Proper Officer, Public Health Medic, Non-medical Public Health Specialist, Health Protection Nurse, Trainee, Environmental Health Professional and others fit in.

It is ideal for anyone involved in Public Health from one of those perspectives.

It involves a mixture of discussion and workshop elements, and has been well received in the past

Course Outline

Session 1

- The legal framework and accountability of the Health Protection Agency, PCT and Local Authority.
- Public Health Proper Officer Duties.
- Legislation relating to them.
